BBM384 PROJECT TEAM KURUVASAN

SOCIAL E-CLUB

What is social e-club ?

- Social E-club is an application that users can meet other people whose interest is common. Users can arrange meetings offline or online for discussion on a specific topic.

Why we need this application?

- There are several interests in our society with the development of our civilization. It might be hard to meet other people whose interests are common. Our application's purpose is to solve this important problem.

Mobile Application

- Nowadays, every people have a mobile phone and they usually handle their works on their mobile phones. We have chosen the develop a mobile phone application for rising of the mobile phone's popularity.

Simple and Useful Design

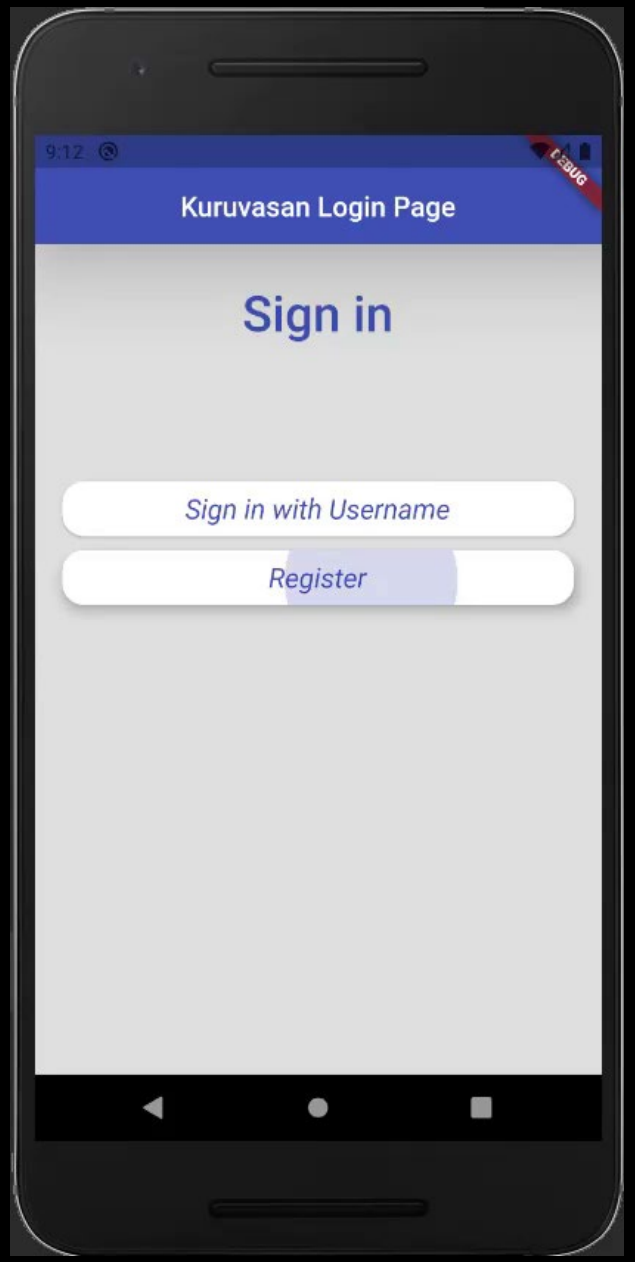
- We have paid attention to the design of an application simple and useful in the developing and designing phase. We have used Flutter on the frontend part in our project. Flutter is Google's UI toolkit for building beautiful, natively compiled applications for mobile, web, desktop, and embedded devices from a single codebase.

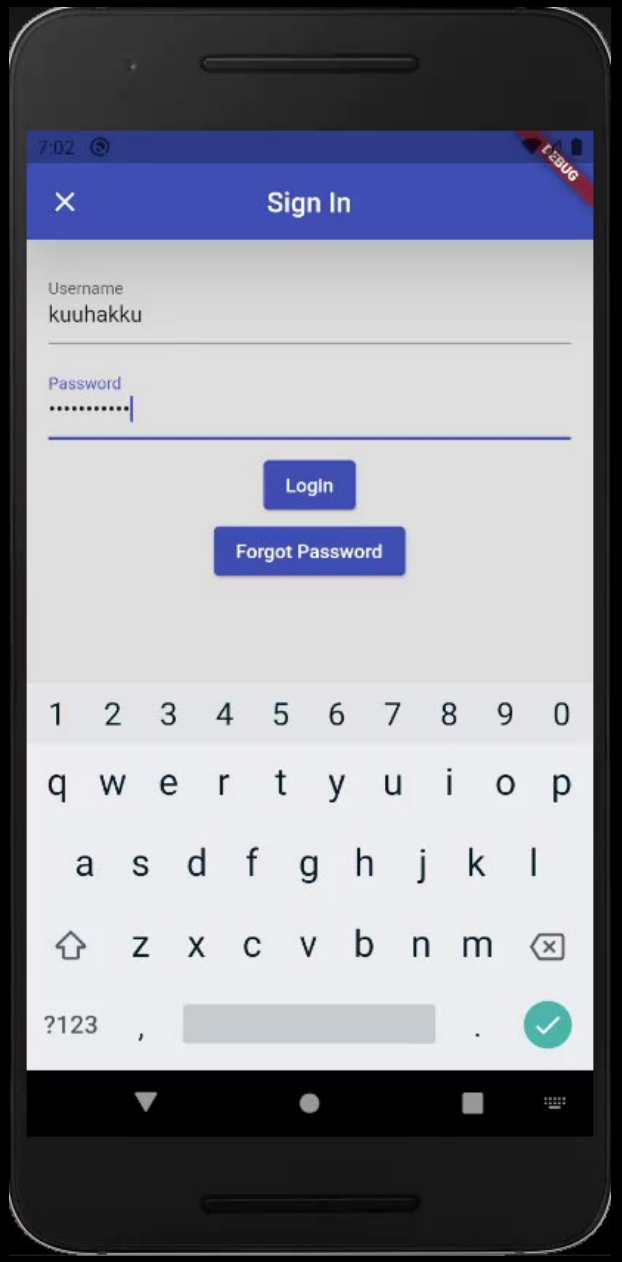
Importance of Security

- We have been aware of the importance of personal data security. Therefore, we have designed our application for this awareness. Even the admins of the application can not reach the other user's data.

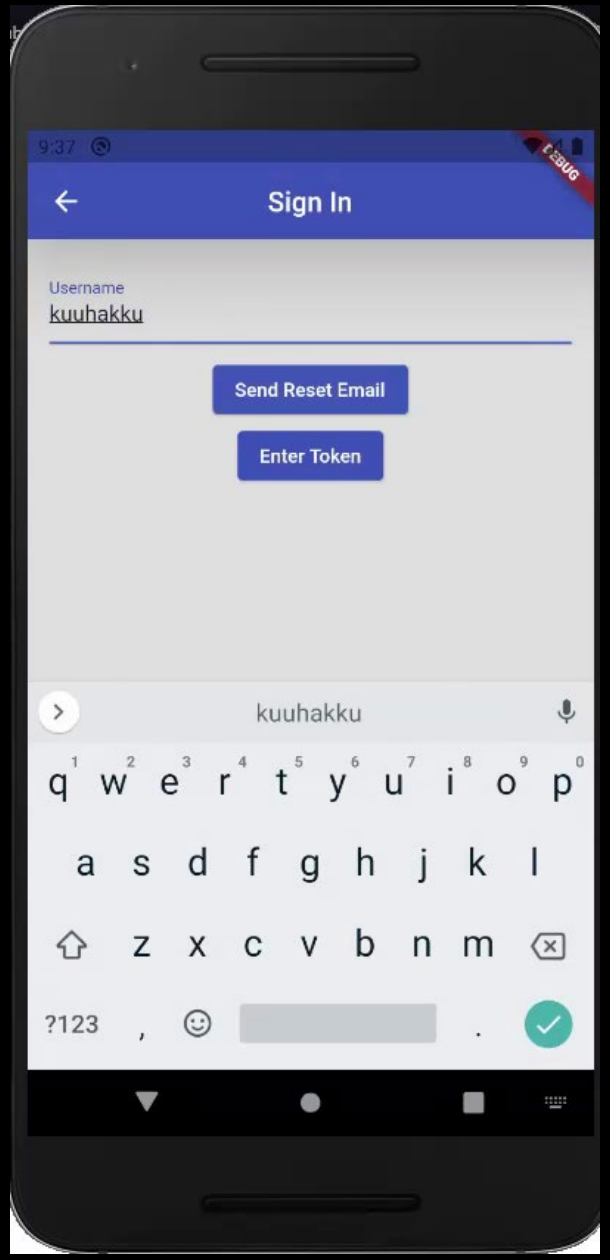
Thanks for Attentions

- Ozan Köksal
- Batuhan Ayvaz
- İlhami Çağkan Çağlayanel
- Batuhan Orhon

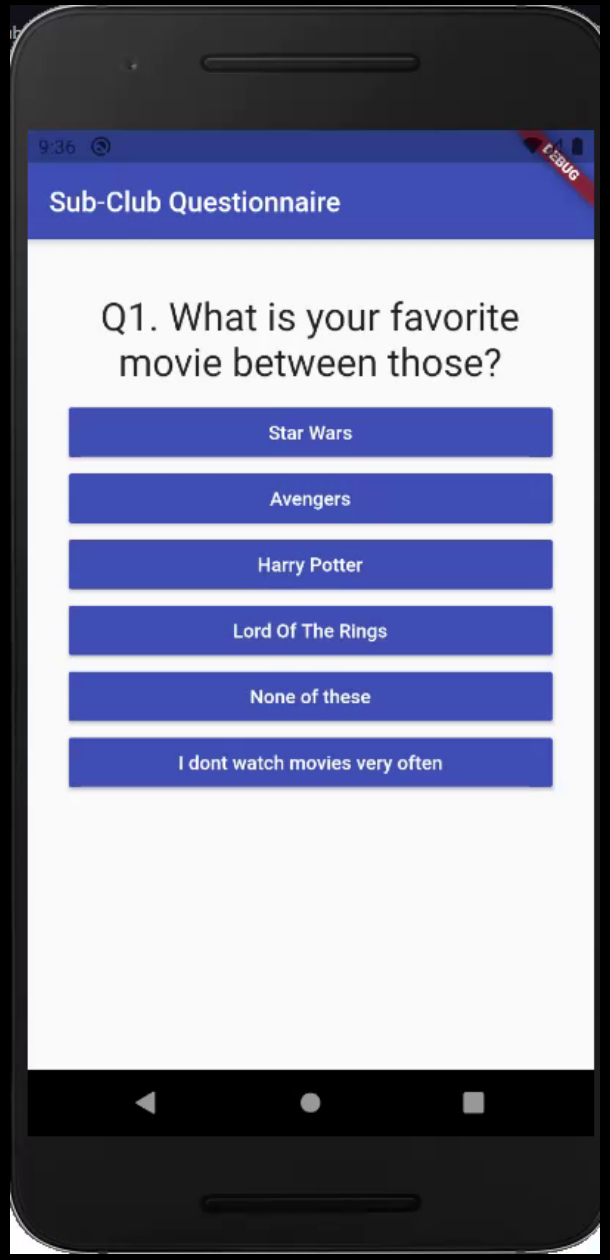




Register/Login operations can be done using email



If a user forgets password, one may send reset email and enter the token that came to the email and choose new password.



User has to fill a questionnaire to join sub-clubs and after they joined to a sub-club, they can see it on the homepage

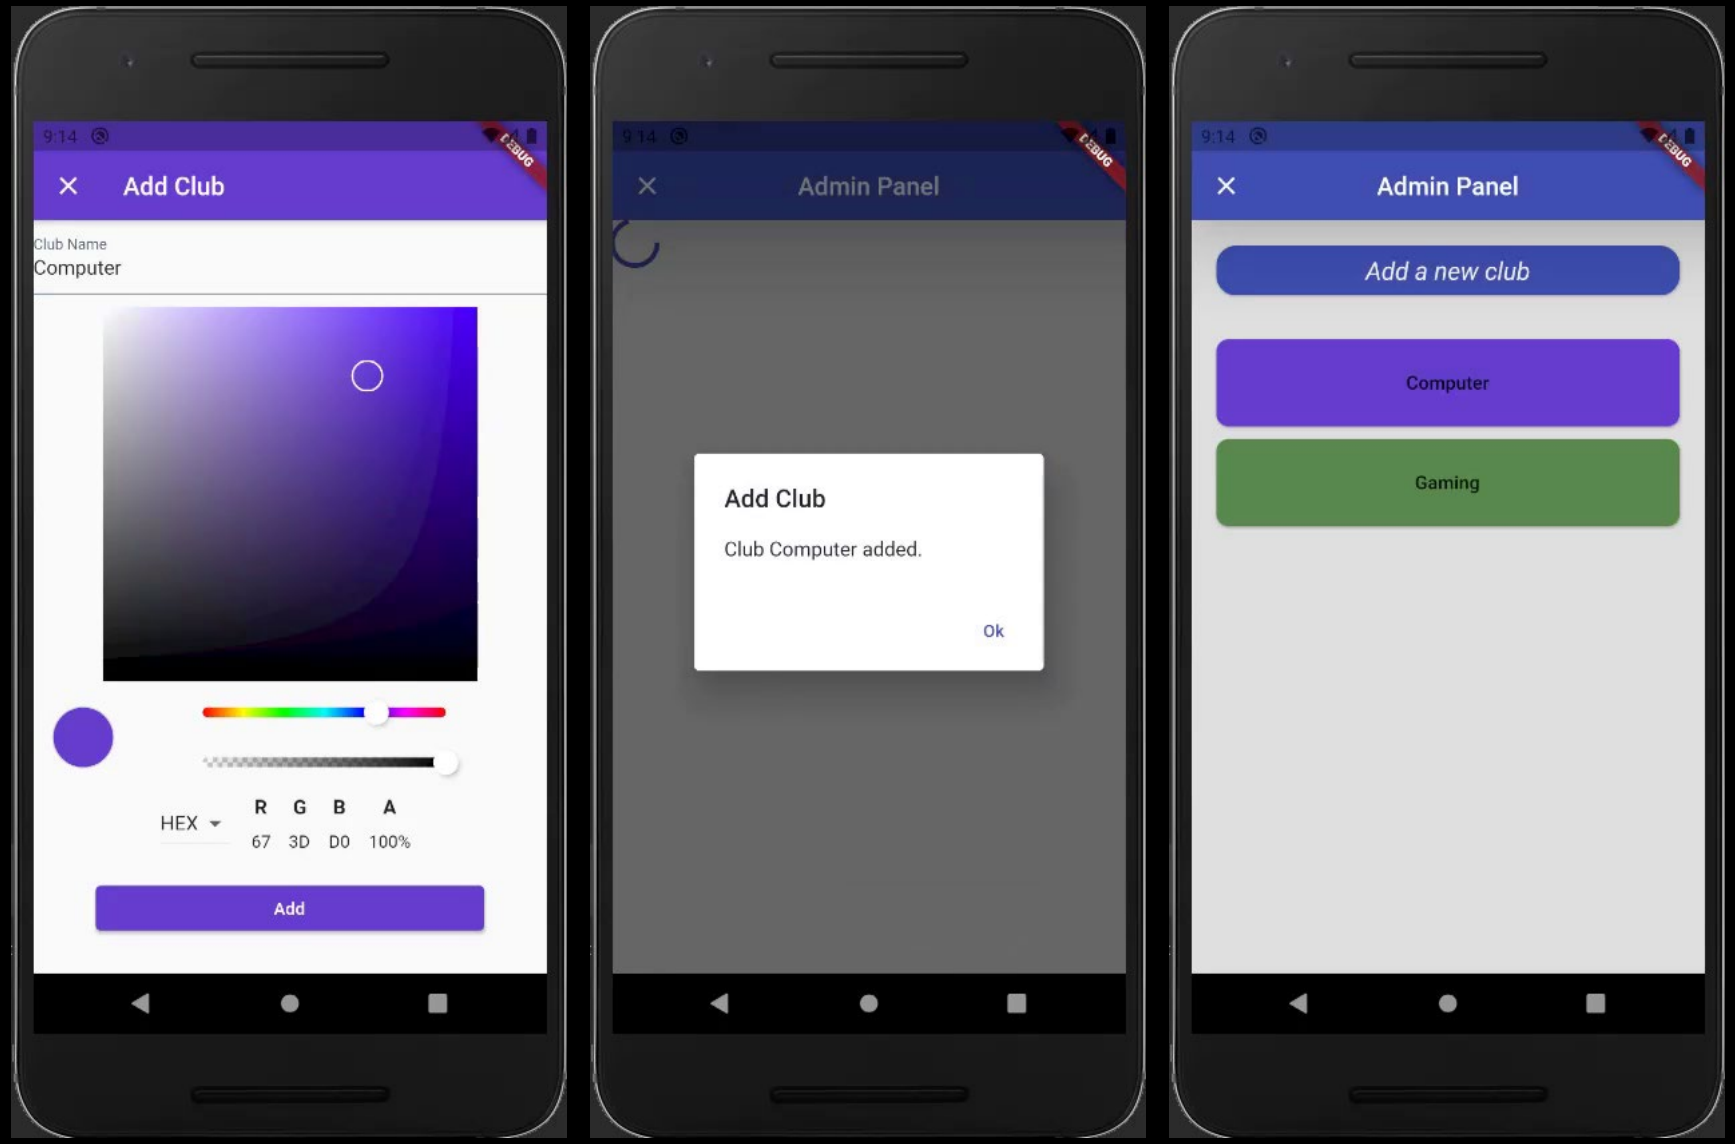
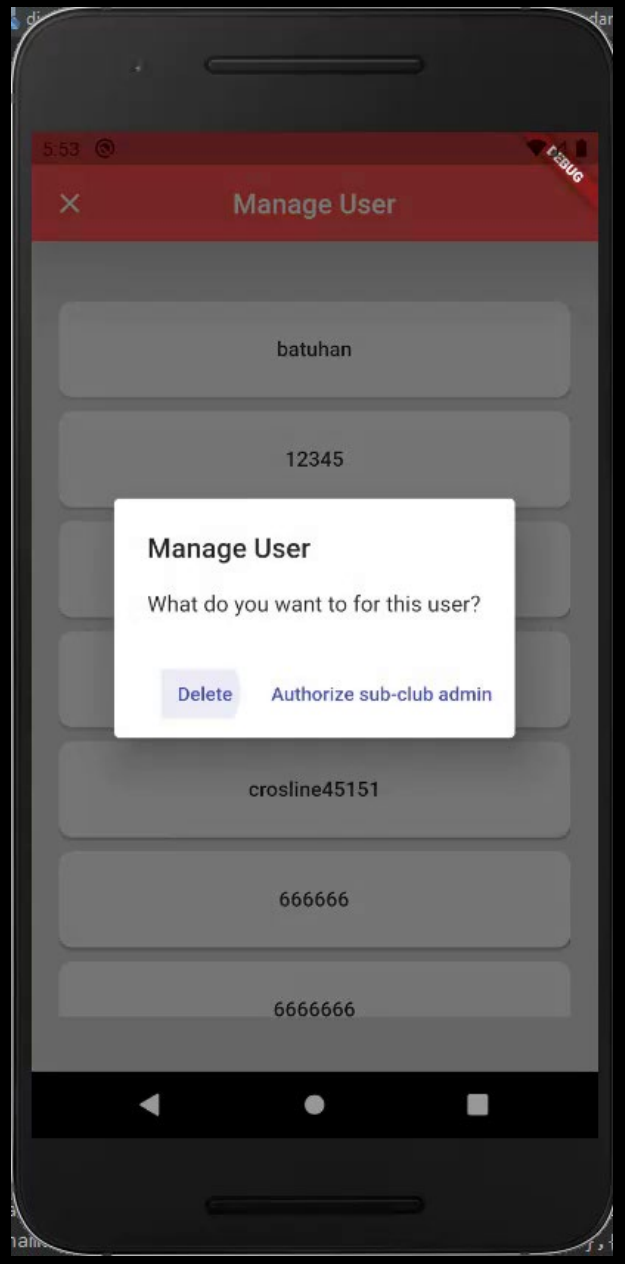
Ok



Of course, without clubs, sub-clubs cannot exist.

Adding and modifying clubs are done through admins as well.



At last, admins can manage users, delete their accounts, authorize them as a sub-club admin or even ban them from a sub-club or the entire app
